ABOUT US

The Leading Molding Brand in North America!

Versatrim is an award-winning leader in the flooring industry, located outside of Raleigh, NC., that manufactures, sells, and distributes a complete line of custom coordinated floor moldings and trims for laminate and vinyl flooring.

Our innovative approach to molding solutions, and its ability to coordinate with most of the top colors in the vinyl, luxury vinyl tile, wood plastic vinyl, and laminate flooring industry, has guided us to the forefront as a leading manufacturer of floor moldings.

In addition to our core products, we have unique offerings that include flexible moldings, stair solutions, adhesive and a variety of accessories to help complete your flooring projects.

We've proudly been serving our customers for over 25 years. For additional information on our products and services please visit www.versatrim.com.

SUSTAINABILITY

Sustainability

Embracing Green Practices for a Sustainable Future

At Versatrim, we are committed to making a positive impact on the environment and promoting sustainable development in the construction industry. We are excited to share with you our innovative solutions that not only enhance the aesthetics and functionality of your projects but also contribute to a greener and more sustainable future.

Eco-Friendly Materials

Our products are crafted using high-quality, environmentally friendly materials that are sourced responsibly. We prioritize the use of recycled and renewable materials, reducing our carbon footprint and minimizing waste.

Waste Reduction

We are dedicated to minimizing waste throughout our manufacturing process. By utilizing advanced production techniques and optimizing material usage, we significantly reduce waste generation. Our commitment to recycling cardboard and aluminum and repurposing further ensures that materials are diverted from landfills.

Longevity and Durability

Versatrim products are built to last, reducing the need for frequent replacements and minimizing waste generation over time. Our durable materials and expert craftsmanship ensure that your projects maintain their quality and appearance for years to come.

Join us in embracing sustainable development and making a positive impact on the environment. Together, we can create a greener future for generations to come.

FLOORING TRIM & MOLDINGS MADE IN THE USA

Made in USA

Versatrim proudly manufactures all flooring trims and moldings in the USA.

Since 1998 our company has been proudly making quality products in our manufacturing facility in Henderson, North Carolina.

Our entire team at Versatrim is dedicated to providing you with the very highest quality products by great service. We welcome the opportunity to serve you.

Thank you for considering Versatrim and supporting made in the U.S.A products.

How to Order

PROGRAM OPTIONS

Versatrim Provides Floor:

We have partnered with many manufacturers to purchase flooring directly to make VersaCaps. A full list of available brands/collections are listed on pages 5 and 6. The listing is also available online at versatrim.com.

Lead Time: up to 15 business days once order has been released.

Customer Provides Floor:

Call your Sales Representative to see what brands/collections have been tested: **1.866.200.8132**. If your flooring is not listed, you can send us the floor to test. Please ask your Sales Rep for a testing form. Once a floor has passed testing and is available to produce VersaCaps, the customer is required to ship at least 20% or more flooring than the quantity of caps requested. Unused flooring or waste will not be returned.

Lead Time: Up to 15 business days once flooring has been received and order has been released.

Ship Flooring to: Attn: VersaCap Orders, Versatrim LLC., 101 Eastern Minerals Road, NC 27537. *Please add your Versatrim Sales Order Number to include on shipping label.*

To Set Up an Account With Versatrim, Please Complete the Following Steps:

- Visit <http://versatrim.com/how-to-order>
- Complete the 2 forms to establish your credit terms:
 1. **Credit Application** – We also accept all major credit cards and certified checks in the event that you choose not to have open credit terms with us.
 2. **Company Contact Form** – This form will enable us to correctly identify your company, to expedite your orders and avoid mistakes.

HOW TO ORDER

Place Your Order 1 of 4 Ways:

Shop Online:

Order Online at versatrim.com and register for a business account by selecting the option on the top tool bar and follow the steps.

Email:

Go to versatrim.com/how-to-order, download an order form & email the completed form to orders@versatrim.com.

Fax:

Fill out the order form (on page 7) or go to versatrim.com/how-to-order, download an order form & fax the completed form to **252.430.8801**.

Phone:

Call Us – Contact Customer Service by calling **1.866.200.8132**, option 2.

Return Policy:

VersaCaps are made to order and are considered a custom product and are Non-Returnable.

WARRANTY

Warranties

We Offer a Limited Lifetime Residential Warranty on Our VersaCaps.

For more information and to view our warranty, please scan the QR code at the left or go to: Versatrim.com/warranties

1 Piece Minimum to Order. On VersaCap orders of 30 or more, customers is expected to accept & pay for a 10% over or under run.
Lead Time: Up to 15 business days once flooring has been received and order has been placed.

VERSACAP: MATCHING STAIR SOLUTIONS

Caps Are Made With Your Actual Flooring to Perfectly Match!

The VersaCap is used to create matching, flush stair treads & returns that perfectly match your floor to give your staircase an elegant cohesive look.

VersaCap is available in the following profiles:

- **VersaCap Edge** - The Edge has a low profile height of 1-7/8"
- **VersaCap Square** - The Square a taller profile height of 2-3/8"
- **VersaCap Round** - The Rounds has a low profile height of 1-3/4"

Order your flooring plank to complete your tread! Available with a cap purchase only and will be cut to the size of the cap.

Lead Time: Approximately 15 business days

1 Piece Minimum per order

VersaCaps are made-to-order: Once an order is placed it cannot be canceled and the product cannot be returned.

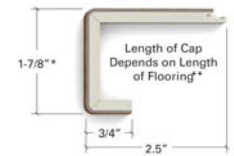

**AWARD-WINNING
PRODUCT!**

VersaCap Edge

Like the VersaCap Square, our VersaCap Edge is made from the actual floor but offers a slimmer profile at 1-7/8" height.

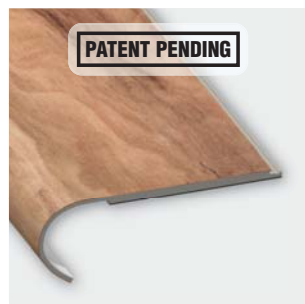

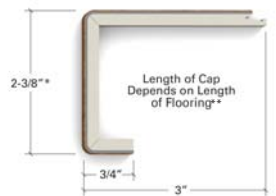

Length: 32-46" Long**

VersaCap Square

The VersaCap Square is used to create matching, flush stair treads & returns that perfectly match your floor to give your staircase an elegant cohesive look.

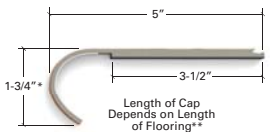

Length: 32-46" Long**

VersaCap Round - *New Profile Now Available!*

Like the VersaCap Square and Edge, the VersaCap Round is made from the actual floor. It offers an elegant rounded edge to enhance your stair treads.

Length: 32-46" Long**

Flooring Plank to Complete Your Tread

If you order a cap in a Versatrim Provided Floor, you can order a flooring plank to complete your stair tread.

Length: Cut to the size of your cap

Flooring plank is only available with a VersaCap purchase! It is not available through the Customer Provides Floor VersaCap program.

Available with VersaCap Purchase only!

*Since flooring thicknesses vary, to find inside height dim. of your VersaCap, measure the thickness of your floor, multiply it by 2, & subtract it from the outside height.

**VersaCap can be produced in varying length. In standard configuration they can not exceed 46". Please inquire within your sales rep if you have require longer length.

White Risers

Order online at **versatrim.com** or call **1.866.200.8132**

WHITE STAIR RISERS

White Stair Risers

Used to enhance stair landings. Our white stair risers comes in high quality TFL cabinet finish that is highly durable, and easy cleanable. No need to paint it white. It is also paintable if you prefer another color.

Surface Material: High Quality TFL (Thermally Fused Laminate)

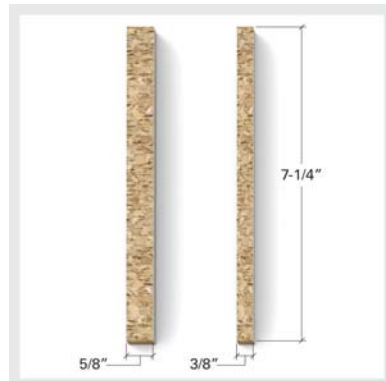

Core Material: Standard Particle Board

Thickness: Our risers come in 2 thicknesses: 3/8" and 5/8" thick.

Length: Comes in 2 lengths: 46" and 96" long

This product is excluded from our free shipping options.

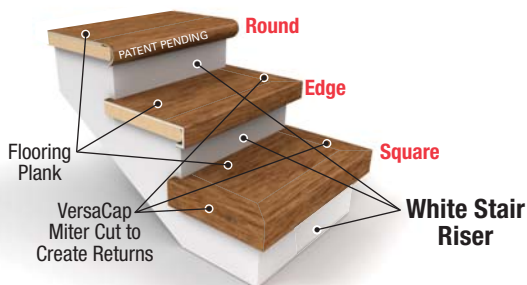

46" Risers ship in bundles of 4 or individually with a VersaCap order. 96" Risers are sold by the pallet (min of 100 pcs.) and ship LTL only.

PRODUCT HIGHLIGHTS:

- Ready to install with a durable TFL white finish
- Lightweight and non-warp particle board core
- Paintable surface*
- Available as a bundle option for our VersaCap (See details below).

*Requires a light sanding before painting

We do not cut risers; we only sell as stock 46" and 96" lengths.

Ask About Our New VersaCap Bundle!

Our **VersaCap Bundle** includes the following:

- 1 VersaCap
- 1 Plank
- 1 Riser**

Other bundle options are also available to help complete your stair project:

- 1 VersaCap & 1 Plank
- 1 VersaCap & 1 Riser**

Ask a Sales Representative For Additional Details & Pricing

**Riser only offered in 3/8 x 46 for bundle. Riser quantity must equal VersaCap quantity ordered. No special cut on Risers.

Accessories

Order online at **versatrim.com** or call **1.866.200.8132**

ACCESSORIES for Installation:

BlueZone Perimeter Tape* - **NEW! In Stock!**

BlueZone outperforms traditional caulking methods. BlueZone applied around the perimeter of flooring installations will effectively seal the expansion area, preventing spills from damaging both the flooring and subfloor.

The ease of use encourages proper perimeter sealing, keeping your floor and subfloor safe for the life of the flooring with proven moisture-proofing technology against liquids, including pet urine.

BlueZone has been proven to be more effective than the standard silicone/backer rod process. Offering a lower cost & more consistent, easier application. Choose BlueZone for a reliable, efficient, and long-lasting flooring protection solution.

Material: Constructed from high-grade 6 mil polyethylene and a permanently tacky rubber adhesive

FOR USE WITH:

- All of our floor moldings and trims.

- Easy, clean application
- No special tools needed
- Low-temperature adherence
- Tear resistance
- Prevents moisture intrusion into floor expansion areas
- Low cost
- Bonds well to most surfaces

CalFlor Installation Kit with VersaBlock* - **NEW! In Stock!**

CalFlor® Flooring Installation Kit with VersaBlock® features quality products, designed to make your projects go smoothly.

The kit includes:

- 1 VersaBlock Tapping Block
- 1 Heavy Duty Steel Pull Bar
- 20 Stepped Spacers

FOR USE WITH:

- For Vinyl, Laminate, & Engineered Flooring

- Sturdy tapered steel pull bar to withstand many installs
- Stepped installation spacers are suitable for different expansion specs
- VersaBlock (Also available separately), features 3 different edges to work with multiple styles of flooring

VersaBlock* - **NEW! In Stock!**

VersaBlock is the perfect tool for all skill levels. Unlike regular tapping blocks that only accommodate one or two flooring edge profiles, the VersaBlock can handle thin, medium, and thick floors, ensuring perfect contact every time.

To maximize the utility of the tapping block features include a ruler, pencil holes for tracing wall curvature and creating straight lines, and a knife notch to help cut off flooring edges with ease.

FOR USE WITH:

- For Vinyl, Laminate, & Engineered Flooring

- Multi-use tool
- Easy Use
- Sturdy Material
- For use with wood, laminate and vinyl flooring products
- Buyer-friendly product minimizes the amount of tools needed on both current & future installs

Molding Adhesive by Versatrim*

The only molding adhesive you'll need! This wet-set, early-grab, 12-hour curing formula is low-odor and easy-to-clean, leaving no surface residue or ghosting, even once dried. It provides an excellent bond for moldings.

10-oz. Cartridge.

28 oz.
Cartridge
COMING
SOON!

FOR USE WITH:

- All moldings, trim & stair solutions

- No Shrink Formula
- High Strength, Waterproof
- Extremely Low VOC
- Covers roughly 15-20 Lin. Ft. depending on application and bead size.
- No Surface Residue
- 12-Hour Cure Time

10-Inch Saw Blade*

Our high quality 10" Saw Blade is ideal for floor moldings and is designed for ultra smooth cross cutting on a table saw or miter saw. Blade work on all Versatrim products, including VersaCaps & VersaEdge Extra Tall (VEX).

FOR USE WITH:

- All moldings, trim & stair solutions

- Carbide Tipped for long life & smooth cuts
- 80 Teeth Alternate Bevel
- Wide range of use, including aluminum
- Blade can be sharpened
- Heat Resistant Non-Stick Coating for cleaner cuts

***Ships Free with Any Molding Order!**

SUSTAINABILITY

HOW TO ORDER

PRODUCTS

INSTALLATION

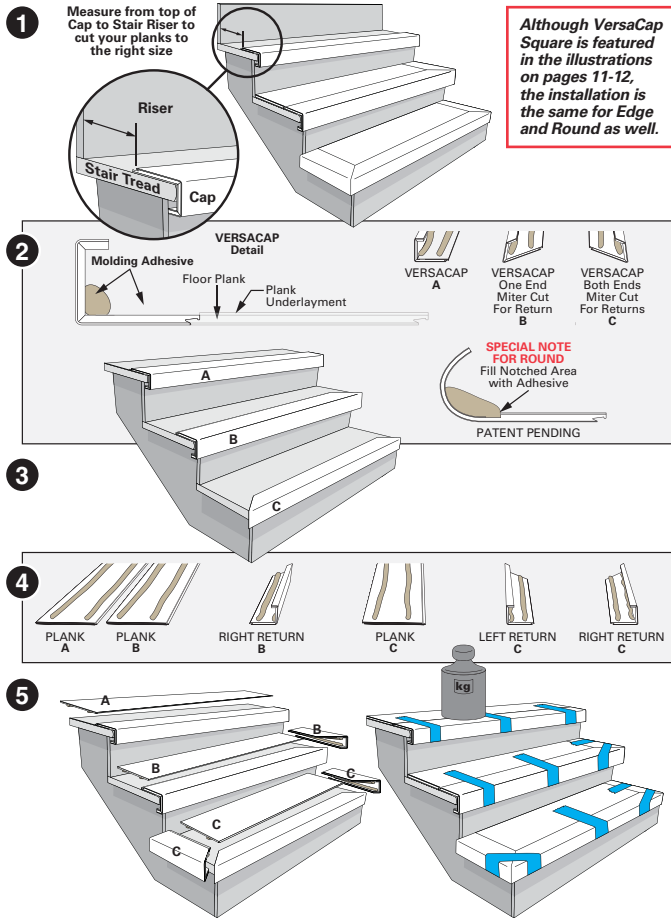

ADDITIONAL PRODUCTS

SHIPPING/PRICING

BASIC VERSACAP INSTALLATION

Versatrim does not recommend that you join two caps together in order to complete one stair nose

Versatrim does not provide custom cuts

CAUTION: Depending on the floor type, the VersaCap may come with padding. If the padding is not securely attached it should be removed from the cap and/or the plank before installing to stair.

NOTE: Small broken areas (less than 1") in the locking system of your Cap will not cause any issues with installation because the cap and floor will be glued down.

Step 1

Clean the staircase from all dust and debris. All wood or concrete stair surfaces must be properly prepared, stable, flat, and free of adhesive residue or anything that may be an adhesive bond breaker. **IMPORTANT:** Installing over existing flooring on stairs is not permitted. Existing flooring must be removed.

Once staircase is clean, measure each stair and cut your planks and caps. If creating returns, use a miter saw set at 45° angles to make the cuts. Dry fit the caps, returns, & planks prior to spreading any adhesive. Leave them in place until ready to glue down.

NOTE: Start at the top of the Stair Case and work your way down. The strategy, as you will see in the steps that follow, will be to glue and staple down the VersaCap first. Then, glue down the plank and/or return(s). Move on to the next stair and repeat Steps 2 to 5.

Step 2

IMPORTANT: The VersaCap does not come with an underlayment. Apply enough adhesive to the broad flat area to make the Caps and Returns level with the floor plank. Turn the first VersaCap over and apply adhesive on the inside corner and a generous amount of Versatrim's Molding Adhesive* on the broad flat area. (See illustration on the left).

Step 3

Place the VersaCap on the stair. Position it where you want it.

Clean up any excess adhesive with a damp rag.

Step 4

Make sure the underlayment is firmly and completely attached to the floor plank. If it is not, either remove it or reattach it with PUR adhesive. Next, take the plank and/or return(s) that go with the VersaCap you just fixed on the Stair. Turn them over and apply a generous amount of Molding Adhesive to them. If installing returns, apply glue to the inside corner of the return and then apply adhesive to the broad flat area of the return like you did to the Cap in Step 2. (See illus. at left).

Step 5

Next, place the plank and/or return(s) in place. Clean up any excess adhesive with a damp rag before applying the painter's tape.

Use painter's tape to tape the VersaCap to the flooring plank and returns. Place a heavy weight across the seams. Let the Molding Adhesive cure for 48 hours before heavy traffic. Once dry, you can remove painter's tape from stairs.

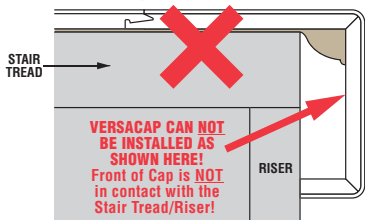

Next, move on to the next stair and repeat Steps 2 to 5.

If your VersaCap is slightly bowed, please see instructions at the bottom of page 12.

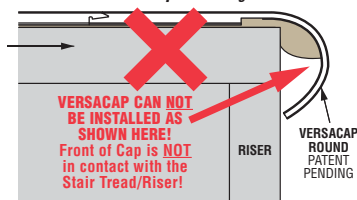

FOR INSTALLING ON A BOX STAIRCASE (NO-OVERHANG), SEE BELOW.

HOW NOT TO INSTALL:

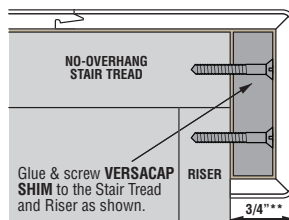

NO-OVERHANG STAIR TREAD
FOR VERSACAP EDGE OR SQUARE
Use Options #1 or #2 at Right

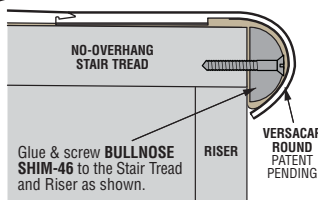

NO-OVERHANG STAIR TREAD
FOR VERSACAP ROUND
Use Shim Option at Right

NO-OVERHANG STAIR TREAD
OPTION #1: VERSACAP SHIM (Page 10)
Screwed & Glued in Place

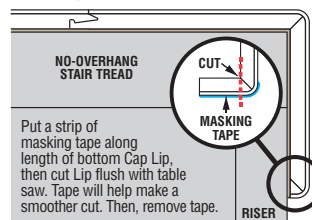

NO-OVERHANG STAIR TREAD
SHIM OPTION: BULLNOSE SHIM-46 (Page 10)
Screwed & Glued in Place

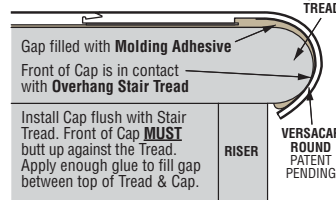

INSTALLATION OPTIONS:

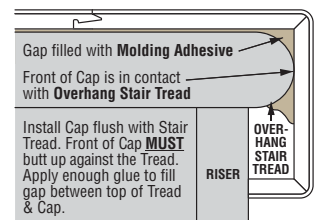

NO-OVERHANG STAIR TREAD
OPTION #2: Cut Bottom Lip of VersaCap so it Lays Flat Against Stair Tread/Riser

OVERHANG STAIR TREAD
Front of Cap is in Contact with Stair Riser

OVERHANG STAIR TREAD
Front of Cap is in Contact with Stair Riser

Need Help Installing?

www.versatrim.com/technical-specifications

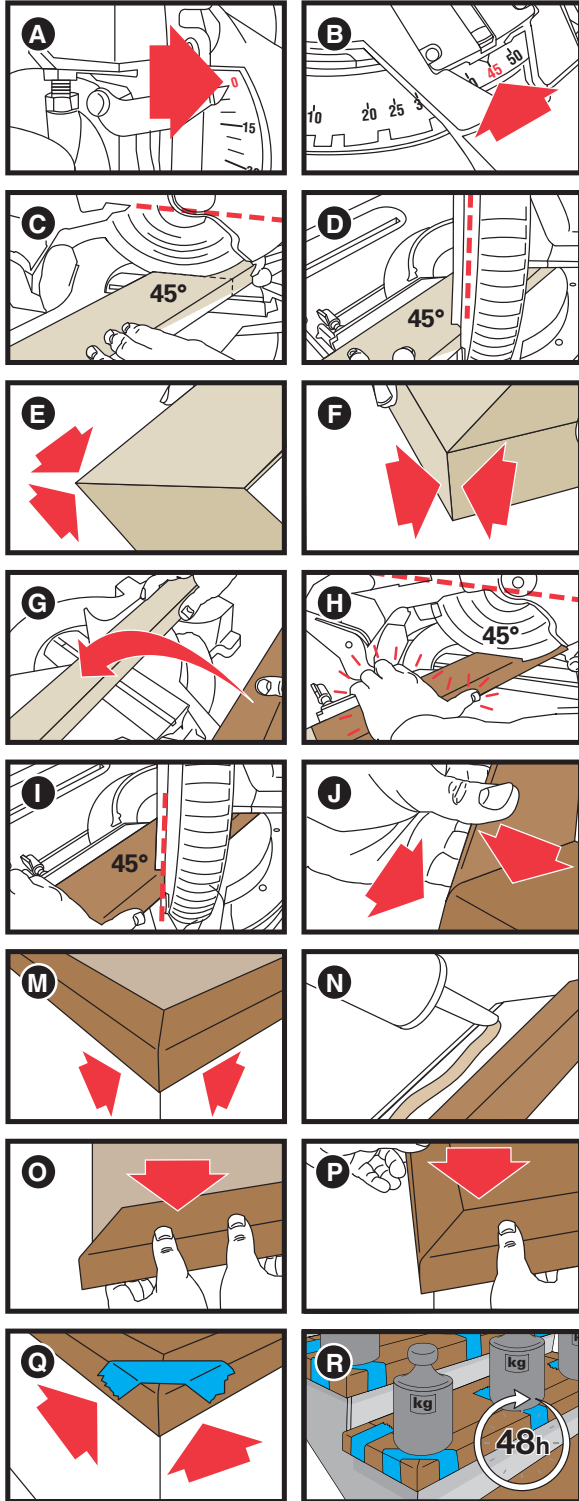

This site is provided as a convenience to our customers for step-by-step instructions as PDFs & easy to follow videos.

*For more information, go to: versatrim.com/molding-adhesive

**Per 2018 Building code (IBC R311.7.5.3) an overhang stair tread of not less than 3/4" is required when treads are less than 11" deep, but please make sure to check with your local code officials as local jurisdictions have their own rules.

CUTTING VERSACAP TO CREATE RETURNS

Versatrim does not provide custom cuts

Make sure to use safety goggles and thick gloves while using saw and handling the blade

Step 1 – MAKE TEST CUTS ON SCRAP 2x4

IMPORTANT: Make sure the bevel angle is set to ZERO (A).

We highly recommend you do a test cut on 2 scrap pieces of 2x4 to make sure your cuts line up. Set the miter angle to 45 degrees for the first cut (B). Cut the 2x4 (C).

Then change angle of miter cut to 45 degrees in the other direction (D). Cut the other piece of 2x4.

Line up ends of the 2x4s to form a corner (E). Check the pieces to see if they line up correctly with **no gap** on the top or front view (F).

Step 2 – CUT YOUR VERSACAP

IMPORTANT: Use a scrap 2x4 piece to set VersaCap on while you make the cuts (G). This will keep them level as you cut.

Set the miter angle to 45 degrees. Cut the VersaCap (H).

REMINDER: Always wear safety goggles when using the saw

IMPORTANT: Hold the VersaCap extremely tight, otherwise it will pull in the direction of the blade and your cut will be off

Change miter angle to 45 degrees in the other direction (I). Cut the other piece that you are using for the Return. Again, **make sure you hold the VersaCap extremely tight. Don't let it move while you make the cut.**

Check the Cap & Return to see if they line up correctly with **no gap** on the top or front view (J).

Step 3 – APPLYING CAP & RETURN TO THE STAIRS

IMPORTANT: The VersaCap does not come with an underlayment. Apply enough adhesive to the broad flat area to make the Caps & Returns level with the floor plank.

After wiping the Cap & Return clean from debris, test the fit on your stairway. Make sure there is no gap between them (M).

After you test the fit, run thick lines of **Versatrim's Molding Adhesive*** along the inside corner and along the broad flat surface of the VersaCap (N).

Put the Cap in place, pressing down firmly to make sure it is in contact with the stair (O). Make sure the edge is square.

Clean up any excess adhesive with a damp rag.

IMPORTANT: Make sure the underlayment is firmly and completely attached to the floor plank. If it is not, either remove it or reattach it with PUR adhesive.

Next, take the plank and Return that go with the VersaCap you just fixed on the Stair. Turn them over and apply a generous amount of **Molding Adhesive** to them. Apply glue to the inside corner of the return and then apply adhesive to the broad flat area.

Next, place the plank and Return in place (P).

Clean up any excess adhesive with a damp rag before applying the painters tape.

While pressing both ends firmly together, stretch a piece of painter's tape tightly across the corner edge to keep the moldings from separating while the adhesive cures (Q).

Place a heavy weight across the seams (R).

Let the Molding Adhesive cure for 48 hours before heavy traffic. Once dry, you can remove painter's tape from stairs.

*** For more information, go to: [versatrim.com/molding-adhesive](https://www.versatrim.com/molding-adhesive)**

When we machine the planks we change the symmetry of tension and some bowing is to be expected. Here is how you install a slightly bowed VersaCap:

- After you cut your planks and VersaCaps to size, dry fit them to see which caps are bowing. You may see a slight 1 to 2 mm gap either towards the ends of the plank or towards the middle caused by the bowing.
- Glue your VersaCap in place on the step. Then apply glue to the back of the plank. We also advise to put a thin swipe of construction glue into the click system of the floor plank.
- Line up the plank to the VersaCap so that both ends meet.
- Start at one end and snap the plank into place by lining it up with the VersaCaps groove and lowering it down.
- Take a strip of painter's tape and start towards the very top of the flooring plank and end under the lip of the VersaCap, or even on the stair riser below the cap, pulling tightly so that the VersaCap and plank are held snug in place by the tape.
- Work your way down to the other end, pressing firmly and using your body weight to push the flooring groove into the VersaCap until it snaps into place.
- Then add strips of painter's tape to the other end and to the center of the tread to hold the VersaCap in place until the glue dries. Apply weights.

VersaCap 6 Inch Sample Piece

Our 6" long VersaCap sample pieces are easy to handle and are available in Edge, Square, and Round. On the bottom of each sample is a label with product specs and dimensions. Our VersaCaps match your floor perfectly, because they are made from the actual flooring.

VersaCap Handheld Display

Our 7" (w) x 7" (d) x 2.5" (h) Handheld VersaCap Display demonstrates how our VersaCap Square and Round will look installed.

Versatrim Tread Sample

Our 10" long Versatrim Tread sample pieces show off our new full tread stair solutions! They come in Round, Square and Edge. The branded tape on the top side of the tread is removed after actual full-size tread installation.

If you are interested in receiving a sample, Email: sales@versatrim.com

Free samples are for flooring businesses only.
